South Carolina Modernized Career and Technical Education Programs

September 2026

Revision 1.4 – November 2026

Introduction

The South Carolina Career and Technical Education (CTE) Modernized Programs Guide serves as the official reference for the state's recognized CTE Modernized Programs. Developed by the Office of Career Readiness within the South Carolina Department of Education, this guide provides districts, schools, and educators with the framework and resources needed to implement high-quality CTE programs. It supports alignment with state accountability requirements, industry and workforce demands, and the goal of preparing students for success in postsecondary education, careers, and lifelong learning.

Students entering high school in the 2027-28 academic year (**9GR28**) and later are required to follow the modernized CTE programs to receive completer status. Students who entered high school prior to the 2027-28 academic year (**9GR27, 9GR26, 9GR25**) may complete the requirements of either the legacy or modernized CTE programs to receive completer status.

Document Details

The Modernized CTE Programs are listed by career cluster.

Notes identify new programs and programs with name or CIP code changes, explain the rationale for the change, and, if necessary, define the new CIP code.

New courses pending development are designated in *italics*.

Courses that qualify a student as a concentrator are identified with **.

- A concentrator is a student who has completed at least two designated courses within the same CTE program. Concentrator data is tracked as part of federal accountability reporting.

The total number of courses required to qualify a student as a completer is designated in each program's title line.

- A completer is a student who has completed the required number of courses in a specific CTE program. Completer data is a state accountability measure.

The Modernized Program Guide identifies secondary-level courses that lead to both concentrator and completer status. However, certain postsecondary courses have been approved as equivalent to secondary CTE courses and may be used to satisfy course requirements for both concentrator and completer status. Approved postsecondary equivalent courses are identified on the corresponding Course Cards in Satchel.

Additional resources related to dual enrollment and course equivalencies include:

- Expanding Dual Credit for CTE Completer Status offers additional guidance on the use of dual credit courses to satisfy completer status requirements.
- How to Pull a Current List of CTE Dual Enrollment Courses from the Course Code Database in Satchel.
- To request an evaluation of a postsecondary CTE course for equivalency to a secondary CTE course, complete the CTE Dual Credit Course Equivalency Application.
