

Task Title: Shape Sizes

Grade Band: Math/High

Item	Standard	Indicator
1	2 The student will analyze characteristics of two- and three-dimensional geometric shapes, understand geometric relationships, and apply spatial relationships using coordinate geometry.	2.5 - Use proportions to solve problems involving similar figures, including scale drawings.
2	2 The student will analyze characteristics of two- and three-dimensional geometric shapes, understand geometric relationships, and apply spatial relationships using coordinate geometry.	2.5 - Use proportions to solve problems involving similar figures, including scale drawings.
3	2 The student will analyze characteristics of two- and three-dimensional geometric shapes, understand geometric relationships, and apply spatial relationships using coordinate geometry.	2.5 - Use proportions to solve problems involving similar figures, including scale drawings.
4	2 The student will analyze characteristics of two- and three-dimensional geometric shapes, understand geometric relationships, and apply spatial relationships using coordinate geometry.	2.5 - Use proportions to solve problems involving similar figures, including scale drawings.
5	2 The student will analyze characteristics of two- and three-dimensional geometric shapes, understand geometric relationships, and apply spatial relationships using coordinate geometry.	2.5 - Use proportions to solve problems involving similar figures, including scale drawings.
6	2 The student will analyze characteristics of two- and three-dimensional geometric shapes, understand geometric relationships, and apply spatial relationships using coordinate geometry.	2.5 - Use proportions to solve problems involving similar figures, including scale drawings.
