

## Lunch Status

**Issue:** The SASI meals code was converted/imported incorrectly for some Phase 1 districts. A lunch code of "N" was imported instead of the correct value of "P". The value "N" will be flagged as an error on the state validation reports.

The screenshot shows a web interface for a school named "Apple Grove High School 1" during the "09-10 Semester 1" term. The user is logged in as "Nelson, Leon". The page title is "Lunch" and it shows a warning icon. The student's name is "Parry, Johnny C" with ID "12 1752" and school "AGHS1". The form contains a dropdown menu for "Lunch status" with the following options: "Full pay (P)", "(no status)", "Full pay (P)", "Reduced (R)", "Free (F)", "Exempt (E)", "Temporary (T)", and "Free-DC (FDC)". The "Lunch ID" is "387" and the "Current balance" is "\$ 4.50". A "Submit" button is located below the form.

**Solution:** Please correct this entry in your data and continue to use the drop down menu when coding lunch status for new student records.

Only the Full Pay (P), Reduced (R), and Free (F) choices should be used. The choices Exempt (E), Temporary (T), and Free-DC (FDC) should not be used and cannot be removed from the list.

One way to modify the lunch field for a group of students is to search for all students with the lunch field = N using the search string

/lunchstatus=N

and then use the group function "Student Field Value" to change the field to a P.
