REPORT OF PRINCIPAL AND SCHOOL IMPROVEMENT COUNCIL

Gadsden Elementary School maintains a focus on supporting a school/community culture that yields evidence of continuous improvement in student learning. Each instructional staff member is highly qualified and several support staff members are recognized by Central Office personnel for superior work performance. The school is committed to a limited number of well-chosen initiatives to guide and facilitate improvement in student learning. These initiatives are: (1) writing in each core academic area, (2) mathematical reasoning and creative problem solving, (3) infusion of technology into the curriculum, and (4) emphasis on literacy, especially at the early childhood level. An early childhood Montessori class compliments more traditional K-4 and K-5 classes to develop fundamental reading skills, as well as number competencies. A primary objective of these initiatives is to enable students to be successful at grade level by first grade.

The Gadsden School Renewal Plan is a comprehensive template for guiding continual school improvement. A major component of this plan is a strong, substantive alignment between content standards, instruction, student work, and assessments. Frequent assessments and analysis of assessment results inform teachers about the next steps in the instructional process. The principal is a full partner with teachers and the community within the school improvement process. Classroom visits and more formal observations take place on a daily basis. During principal-teacher conferences, goals are reviewed, student learning growth is monitored, and decisions are made regarding strategies that will be used to continually improve student achievement.

Several data sources are analyzed on an ongoing basis to inform personnel about progress toward school goals. The school community is becoming proficient at using MAP data to support standards based instruction. Second-year MAP results show improvement in math and reading between fall and spring administrations. Similarly, Successmaker Lab reports and Benchmark results document growth in student learning throughout the school year. Gadsden Elementary met expectations for Annual Yearly Progress (AYP). In addition, the school earned Excellent Report Card Ratings for Absolute and Improvement categories.

Teachers and the principal work together in a variety of formats to build capacity for student learning. Grade-level conferences are used in part to identify students who need specific interventions to master specific content standards. Frequently, consultants work with small groups of teachers and the principal to strengthen skills in using proven strategies to assist reluctant readers or struggling mathematicians.

Gadsden Elementary must continue to make progress toward resolving a limited number of challenges, in order to more fully realize connections between content standards, instruction, and assessments. These clear and concise connections will make learning more efficient for students. Families and the community need to be engaged in a stronger partnership with the school to promote student learning outside of the school day. Finally, the number and quality of school-business partnerships must improve to provide students with supplementary educational and mentoring experiences.
