REPORT OF PRINCIPAL AND SCHOOL IMPROVEMENT COUNCIL

RLOA is a Title 1 school with approximately 94% children of poverty, with one-third Hispanic, one-third African-American, and one-third Caucasian. As a second-year charter school, we sought to improve performance through increased rigor, accountability, and support to teachers. MAP results showed that every grade made average gains of 7.67 in math and 6.37 in reading from Fall 2013 to Spring 2014 in the Mean RIT score. The percentage of students who increased 5 or more points from Fall 2013 to Fall 2014 in each grade was an average of 68.52 in math and 52.69 in reading.

A school-wide improvement plan was instituted in January 2014 based on the results of Winter MAP testing. Use of software such as Pixton, iXL Math, Study Island, Open Book and Raz-Kiz (for ESOL students), increased time with reading and math interventionists for struggling students, additional paraprofessionals and the expanded use of paraprofessionals, and additional time with teachers in Saturday School were part of the strategies to enhance student performance and individualize learning for student growth. A staff incentive program for Spring MAP testing was also put in place to encourage extra efforts to help students achieve.

In addition, the targeted use of technology was used to support instruction and remediation. The school purchased a large number of ChromeBooks and Asus tablets to supplement the 25 computers in the computer lab for students to use for instruction, research, enrichment, and remediation. ESOL students met with ESOL teachers and completed assignments in OpenBook every morning before school started and had access to RazKiz for differentiated reading. Paraprofessionals were provided for every classroom grades K-6 and an additional two paraprofessionals who divided their time between grades 7-9. Struggling students received additional targeted reinforcement during enrichment/remediation time and in Saturday School in programs such as Study Island, iXL Math, and Pixton. The Guidance Counselor sought to ensure that students who had not completed assignments or were struggling attended Saturday School, where certified teachers and paraprofessionals were assigned to students.

We are pleased that 80% of our students passed the English 1 EOC and 70% passed the Algebra 1 EOC, based on the state grading scale. While PASS writing and social studies scores show marked improvement from the first year's scores, we did not see the gains in ELA, math and science for which we had worked. Retention of certified teachers for math in middle-high school and in ELA in grades 7-8, the loss of the Assistant Principal for Instruction for middle-high school in December 2013 because of illness, and the illness of other key administrators caused difficulties and impacted student performance. In addition, the instructional staff consisted of a number of first-year teachers, who struggled, even with extra support.

The preponderance of students who enroll in our school more than one grade level behind is a telling indicator of the work still to be done.
