The Legislative Mandate

Statutory Authority: 1976 Code Sections 59-5-60(1), 59-25-110, 59-26-10 et seq., and 20 U.S.C. 6301 et seq.

State Board of Education Regulation 43-62. Areas of Certification.

I. INITIAL CERTIFICATION AREAS AND GRADE SPANS

In consultation with the South Carolina Department of Education (SCDE), the State Board of Education (SBE) has the authority to establish initial certification areas or fields as well as certification grade spans, to revise or amend certification areas, and to abolish certification areas that no longer reflect professional practice or needs of South Carolina schools and students.

II. ADDING AREAS OF CERTIFICATION

In consultation with the SCDE, the SBE has the authority to establish certification areas that may be added to a valid educator certificate, to revise or amend these areas, and to abolish add-on certification areas that no longer reflect professional practice or needs of South Carolina schools and students. In order to add an additional area of certification to a valid South Carolina credential, an educator must complete the specific requirements for that area as outlined by the SBE's guidelines.

III. SPECIALIZED ENDORSEMENTS

In consultation with the SCDE, the SBE has the authority to establish specialized endorsements that may be added to a valid educator certificate, to revise or amend specialized endorsement areas, and to abolish specialized endorsement areas that no longer reflect professional practice or needs of South Carolina schools and students. In some instances, an endorsement may be required to teach specific courses. In other instances, the endorsement represents additional training and study to enhance an educator's professional practice. In order to add an endorsement to a valid South Carolina teaching credential, an educator must complete the specific requirements for that area as outlined by the SBE.

IV. SPECIALIZED ALTERNATIVE CERTIFICATION

In consultation with the SCDE, the SBE has the authority to establish alternative certification areas and routes that are based on specialized training and do not lead to an alternate route certificate, revise or amend these specialized areas, and abolish specialized alternative certification areas that no longer reflect professional practice or needs of South Carolina schools and students. In order to be issued an educator certificate in one of these areas, the applicant must complete the specific requirements for that area as outlined by the SBE.

Introduction

Regulation 43-62 Areas of Certification establishes that the State Board of Education (SBE), in consultation with the South Carolina Department of Education (SCDE), has the authority to establish initial certification areas or fields as well as certification grade spans, to revise or amend certification areas, and to abolish certification areas that no longer reflect professional practice or needs of South Carolina schools and students. These guidelines establish the fields and related grade spans in which South Carolina offers educator certification.

For the purpose of these guidelines, a certification field is defined as content area or subject that may be issued on an educator credential and reflects an educator's content and/or professional preparation.

Educator certificates are issued for the following three categories:

- Teaching Fields,
- Service Fields, and
- Leadership and Administrative Fields.

Listed in each section below are the individual certification fields with related grade span or age range. Please note that in referring to grade spans, the following abbreviations are used throughout this document:

- Pre-Kindergarten: PK
- Kindergarten: K

This document lists the content area fields that may be issued on a South Carolina educator certificate. Information regarding the acceptable certification fields for the roles and responsibilities to which an educator may be assigned is published annually by the SCDE in the Required Credentials for Professional Staff Members in the Instructional Programs of South Carolina's Public Schools.

If a certification field is eliminated, it will remain on an educator's certificate so long as the individual maintains a valid credential.

If a certification field is revised or updated, the previous title will remain on an educator's certificate so long as the individual maintains a valid credential. An educator has the option to request an evaluation to determine eligibility for the revised certification field.

If a certification field is renamed without substantial changes to the requirements, the current field listed on an educator's certificate may be updated with the new title.
