ACKNOWLEDGMENTS

South Carolina College- and Career-Ready Standards for Visual and Performing Arts Proficiency was collaboratively written by a team of South Carolina classroom teachers, instructional coaches, district leaders, higher education faculty, and educators who specialize in Visual and Performing Arts education and assessment. We gratefully acknowledge the efforts of the following individuals and groups for their assistance in the development of new, high quality, *South Carolina College- and Career-Ready Standards for Visual and Performing Arts Proficiency*.

- *South Carolina College- and Career-Ready Standards for Visual and Performing Arts Proficiency* was developed under the direction of Dr. Julie Fowler, Deputy Superintendent, Division of College and Career Readiness; Dr. Anne Pressley, Director, Office of Standards and Learning; and Carrie Ann Power, Education Associate, Visual and Performing Arts.
- *South Carolina College- and Career-Ready Standards for Visual and Performing Arts Proficiency* was reviewed by higher education faculty and a task force appointed by the South Carolina Department of Education and the ABC project, which included educators, business and community members, and higher education faculty. All feedback given by these individuals and groups were considered during the revision phase of the development process.
- The committee thanks the World Language department for guidance and support in developing a proficiency-based model for arts education.(Please see <http://ed.sc.gov/instruction/standards-learning/world-languages/>)
- The committee is grateful for permission to use and adapt *The National Core Arts Standards* to develop the 2017 *South Carolina College- and Career-Ready Standards for Visual and Performing Arts Proficiency*, referenced here as follows. FREQUENTLY ASKED QUESTIONS

- **What is the purpose of the *College- and Career-Ready Standards for Visual and Performing Arts Proficiency*?**

In general, the purpose is to clarify and define a progression of learning in user-friendly language that learners can easily interpret. The standards documents help motivate learning by showing how to set achievable goals, self-assess, and chart progress by using “I can” statements. Learners take ownership of their individual artistic development. This document provides examples of learning targets that can be used regardless of age, class level, or content studied. By posting or citing daily learning targets and celebrating success, teachers can model behavior that leads students to become autonomous learners. This document provides a clearer understanding of what learners need to know to move from one level of proficiency to the next.

For learners, the purpose is to:

1. demystify learning in the arts by simplifying and clarifying the process;
2. provide clear descriptions of what can be achieved at various proficiency levels and make expectations more realistic; and
3. offer examples of small, incremental, and achievable goals that learners can use to set personal goals, self-assess, and chart their own progress.

For teachers, the purpose is to:

1. guide learning toward more functional goals;
2. provide examples of learning targets—lesson scenarios which can be used across ages, class levels, or content studied; and
3. clarify skills needed by learners move from one level to the next.

For parents, administrators, and other stakeholders, the purpose is to:

1. create user-friendly terminology for course, unit, and lesson development and
2. define exactly what is expected of learners at different levels of proficiency.

- How do the *South Carolina Standards for Visual and Performing Arts Proficiency* align with the *Profile of the South Carolina Graduate*?

The *Profile of the South Carolina Graduate*, located at the South Carolina Department of Education website, http://ed.sc.gov/scdoe/assets/File/instruction/standards/ELA/Agency%20Approved%20Profile-of-the-South-Carolina-Graduate_Updated.pdf, is described in the following graphic.

The Visual and Performing Arts standards reinforce the objectives outlined in this profile. The standards are designed to prepare South Carolina learners to meet new challenges in college and career readiness through contextual knowledge, training, and life and career skills that will create a better-prepared workforce for tomorrow (Prepared by *The South Carolina College and Career Readiness in the Arts Task Force* 2016.)

World-Class Knowledge

- ✓ The Arts teach a diverse and transferable set of learning skills.
- ✓ Arts courses enable learners to be creative in their approach to problem solving and to visualize concepts in new ways.
- ✓ Rigorous, comprehensive, and sequential arts programs based on the 2017*South Carolina Visual and Performing Arts Standards* provide a foundation for college and career opportunities.

World-Class Skills

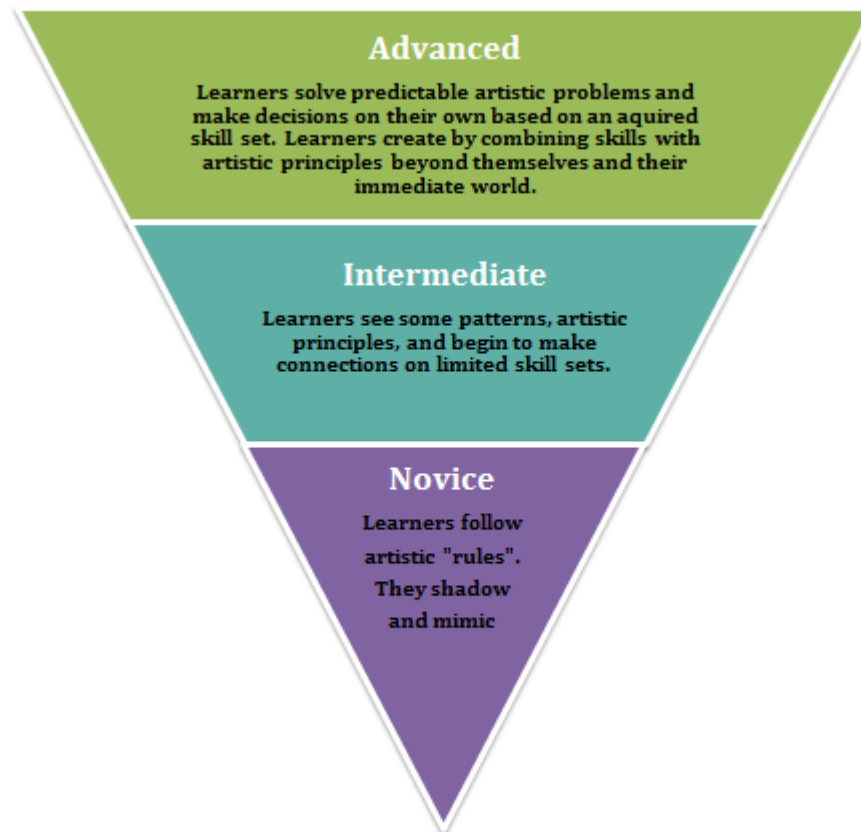

- ✓ The 2017*South Carolina Visual and Performing Arts Standards* set achievable, measurable goals to build knowledge and skills necessary to prepare learners for the future workplace.
- ✓ Artistic processes develop critical thinking and problem-solving skills as learners create, refine, and reflect on their work and the works of others.
- ✓ Through collaborative arts experiences, learners acquire skills necessary to communicate effectively as part of a team.

Life and Career Characteristics

- ✓ Learning in the arts through history and culture broadens global perspectives.
- ✓ Rigorous quality arts experiences require learners to persevere through experimentation, repetition, and mastery of their arts discipline.
- ✓ The arts require learners to be disciplined, dedicated, and demonstrate a strong work ethic.

- **Why do the *College- and Career-Ready Standards for Visual and Performing Arts Proficiency* apply to all learners regardless of grade level?**

Learners' progress toward proficiency at different rates, and the proficiency level they reach is often determined by the amount of instructional time and courses offered in visual and performing arts. Therefore, learners at similar ages frequently demonstrate varying proficiency levels. For this reason, *College- and Career-Ready Standards for Visual and Performing Arts Proficiency* outlines the progression of learner skills, rather than grade level, which makes it easier for teachers to identify and differentiate learning for all learners. This document describes the competencies a learner should demonstrate at three levels of proficiency. The three proficiency levels used for this document, novice through advanced, are further subdivided into low, mid, and high sublevels.

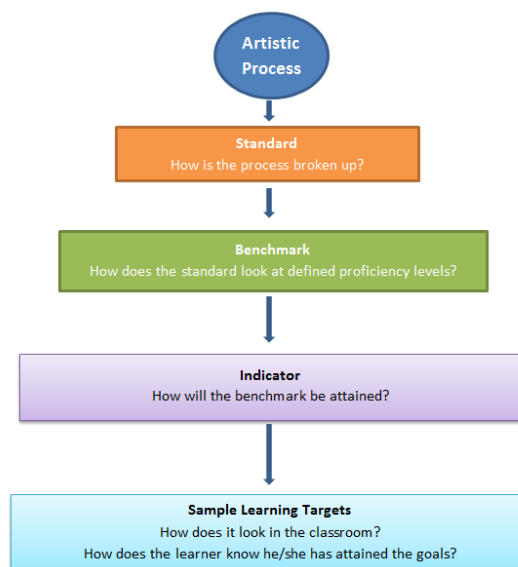

- **How are the *College- and Career-Ready Standards for Visual and Performing Arts Proficiency* organized?**

The content of the *College- and Career-Ready Standards for Visual and Performing Arts Proficiency* is organized according to the artistic processes outlined in the 2014 National Core Arts Standards, which provide a unified view of the standards for all eight arts disciplines.

The artistic processes are

- creating
- producing, performing, presenting
- responding
- connecting

Each artistic process is broken down into standards that define the learning for that artistic process. Benchmarks deconstruct the standard into defined levels of proficiency to establish course learning targets. Indicators are units within the benchmarks that further clarify the learning goals within the benchmark. Sample learning targets are lesson scenarios that can be used across ages, class levels, or content studied.

DOCUMENT ORGANIZATION

Artistic Processes: Each arts content area is organized by four Artistic Processes: Creating, Performing/Producing/ Presenting, Responding, and Connecting. Common artistic processes for all arts areas promote a common language and streamline the overall document for a uniform structure.

Each set of standards begins with an overview from Novice Low all the way to Advanced High to show how benchmarks build through defined levels of proficiency. Separate Novice, Intermediate, and Advanced charts were made to include *Sample Learning Targets* for each Indicator.

Novice, Intermediate, and Advanced with sublevels of low, mid, and high, define the levels of proficiency.

Each **Artistic Process** is broken down into **Anchor Standards**. The Anchor Standard is a broad learning goal statement which is broken into Benchmarks.

Artistic Processes: Creating- *I can conceive and develop new design ideas and work.*

Anchor Standard 1: *I can conceive and develop a design challenge.*

Learner Benchmarks are broad summary statements of what learners can do at specific proficiency levels. They allow learners to chart their progress on the continuum of learning.

Learning Indicators deconstruct the benchmarks to show the range of functions that learners can expect to experience and attain.

- What is the numbering system for the standards document?

Numbers and Letters: De.CR.NH.1.1 = Design, Creating, Benchmark, Standard 1, Indicator 1

- **How will the South Carolina Standard for *College- and Career-Ready Standards for Visual and Performing Arts Proficiency* be used?**

Districts, schools, programs, and independent learners will:

- create long-range program proficiency goals which reflect of a shared vision;
- identify proficiency benchmarks for assessment at designated intervals; and
- develop a plan to support learners in meeting identified proficiency benchmarks.

- **How will teachers use the *College- and Career-Ready Standards for Visual and Performing Arts Proficiency* to plan?**

To make the best use of this document, teachers will apply the principles of backward design to curriculum, unit, and lesson planning. The premise of backward design consists of three stages:

1. identify the desired results;
2. determine what evidence demonstrates that learners have achieved those results; and then
3. plan learning experiences that match (see Wiggins, G. &McTighe, J. [2005]. *Understanding by design*. [2nd ed.]New York: Pearson).

The desired results are defined as the learning benchmarks (general) and the learning indicators (specific). Learners demonstrate proficiencies through Integrated Performance Assessments (IPAs).

As teachers implement the document they use the:

- benchmark statements to establish the expectations for learner performance at the identified proficiency level;
- learning indicators to identify measurable, attainable goals; and
- sample learning targets as examples of real-world contexts that can facilitate the learning.

- **How do I grade with a proficiency-based system?**

In order to determine learner growth in proficiency sublevels, the grading system must reflect sustained performance of “I can” learning targets of a course to move immediately to the next level. The proficiency sublevels outline the knowledge and skills learners must demonstrate consistently and do not reflect behavior, attendance, grading on a curve, extra credit or assignments based solely on

recall or discrete-items. Grading on work habits should be a separate category and can include homework assignments, class participation, and meeting deadlines.

A proficiency-based model enables the learner and teacher to track individual progress towards standards mastery. Teachers must use pre-assessments to set initial proficiency targets and differentiate instruction for the learner. All indicators at one level of defined proficiency must be mastered before the benchmark is met.

Dance

Introduction

In the United States, educational legislation and policy drives how Departments of Education support and sustain quality academic programs across the country. In this endeavor, academic standards have been instrumental in providing conceptual and evaluative frameworks to outline the comprehensiveness and rigor of subjects taught in K–12 education throughout the country. In accordance with this tradition, the 2017 South Carolina academic standards for Dance are based upon the four artistic processes that frame the National Core Arts Standards in Dance. In addition to identifying artistic processes as means for categorizing the content and skills at various levels of experience, learner indicators and sample learning targets provide more specific information about how students can achieve desired outcomes in dance classrooms.

Based upon data from a compilation of studies, Americans for the Arts asserts that a student who studies the arts is more likely to “stay in school, succeed in school, succeed in life, and succeed in work” (Americans for the Arts and Vans Custom Culture, 2013). Furthermore, a review of recent studies by the National Dance Education Organization entitled *Evidence: A Report on the Impact of Dance in the K-12 Setting* revealed that dance can improve student achievement, teacher satisfaction, and school culture (Bonbright and Bradley, 2013). The specific examples from across the country highlighted in this report indicate how dance positively influences teaching and learning within educational settings.

However, despite the presence of such evidence, dance, along with theatre, still remains underrepresented among other art forms across the country in K–12 education and in studies conducted by National Center for Education Statistics (Parsad and Spiegelman, 2012; Bonbright and Bradley, 2013; Americans for the Arts and Vans Custom Culture, 2013). Fortunately, dance in South Carolina maintains a greater presence in K–12 education than in other states around the country and the southeast (Parsad and Spiegelman, 2012; Cook, 2009; Bonbright and Bradley, 2013; Americans for the Arts and Vans Custom Culture, 2013). These revised academic standards in dance in our state further demonstrate that as a discrete discipline, dance contains specialized and integrated content and measurable skills that align with current educational policy and initiatives within South Carolina such as the *Profile of the South Carolina Graduate*. While primarily a tool for the dance classroom, these standards also provide teachers, school administrators, parents, and other stakeholders within the “ecosystem” of arts education with a resource for demonstrating the value of dance in education and life (Americans for the Arts and Vans Custom Culture, 2013b).

The benchmarks in the 2017 Academic Standards for Dance, which range from novice low to advanced high, appear in a sequential progression of dance content and skills that account for the fact that students across the state experience varying degrees of access to dance instruction. Dance teachers—who are held accountable for students’ attainment of the dance standards—must therefore understand how the benchmarks, learner indicators, and sample learning targets provide for sequential learning within their respective environments. While the four strands of dance (performing, creating, responding, and connecting) are separated to indicate the numerous components comprised within each artistic process, the authors view artistic engagement as a fluid practice in which content and skills from each area constantly inform one another, the act of creating, and the final product that results from artistic investigation. The authors of the dance standards also approached the standards with the perspective that *all* dance forms are world dance forms and have a cultural basis that shape their evolution throughout time (Kelalinohomoku, 1983, p. 533). While acknowledging that some cultural practices might have greater prominence in our specific cultural and geographic location, the concepts and tools used to kinesthetically and cognitively understand dance can be applied universally with the assumption that they are further informed by cultural specificity. Therefore, no specific philosophy of dance is prioritized over others in this document in an effort to be inclusive of a wide range of movement practices and their corresponding contributions to history and culture. The concepts and skills within the document can be applied in numerous ways to reflect cultural traditions that exist within and outside of the classroom, students’ backgrounds, and their areas of interest. Finally, these standards were written with the intention that they could be applied in any K–12 classroom across the state regardless of access to dance education and/or resources within a school environment. The primary instrument used to facilitate dance instruction is the body moving through space and time; therefore, *all* schools should be able to use this document to guide dance instruction regardless of the specialized resources within the school setting.

Schools interested in developing quality dance programs should consult Winthrop University’s *Opportunity-to-Learn: Standards for Arts Education*, Arts in Basic Curriculum Project, online at <http://www2.winthrop.edu/abc/learn.htm>. In addition, program development recommendations can also be gleaned from the South Carolina Department of Education document *Essential Elements of a Quality Visual and Performing Arts Program*, available online at <http://www.ed.sc.gov/arts>

Dance Glossary

AB Two-part (binary) form; musical/dance structure in two sections each contrasting with the other.

ABA Three-part form: A = one dance phrase, B = a different dance phrase, A = the original phrase again.

Abstract Movement Movement that is not narrative. It shows the essence, or quality of an idea.

Analyze to recognize the constituent parts of something.

Augmentation A process for manipulating dance movement by making the original theme or motif larger or greater with respect to space, time, or energy.

Bound Of or pertaining to a manner of using energy that communicates a controlled intent.

Canon Any dance movement or sequence that is performed like a musical round (i.e., the original theme is imitated exactly by another person or group, each one beginning at a slightly different point in time).

Chance A choreographic process in which elements are specifically chosen and defined but randomly structured to create a dance or movement phrase. This process demands high levels of concentration in performance to deal effectively with free-association and surprise structures that appear spontaneously.

Choreographic Device Techniques used to create variations in movement that are based in **dance elements**. (e.g., fragmentation, diminution, repetition, changing a dancer's facing, etc.)

Choreographic Processes Techniques that assist choreographers in developing dance works by deliberate choice making, reflection upon the work-in-progress, and exploration and planning in reference to a specific artistic intention.

Choreographic Structures The specific compositional forms in which movement is structured to create a dance, such as theme and variation, canon, ABA, and rondo.

Choreography The steps, groupings, patterns, and other combined elements of a dance composition that are planned and performed.

Classical Dance that has been developed into highly stylized structures such as ballet, Bharatanatyam, or other classical styles within a culture. Generally developed within the court or circle of power in a society.

Composition(1) The dance-making process. (2) The end product of the process of exploring movement possibilities; experimenting with a broadly focused movement idea or concept; selecting the movement to be developed further, formulating the structure of the composition/study/phrase, clarifying or “cleaning up” the movement, rhythm, accents, pathways, and body designs so that the intent is clear; and refining the execution of the movement so that the composition can be performed consistently with finesse appropriate to the skill level of the dancer(s).

Dance Elements The building blocks of dance movement; movement of the body using space, time, and dynamics/energy.

Dance Work An organized, complete, choreographic product that can be comprehended on its own merit.

Diminution Manipulating dance movement by making the original theme or motif smaller with respect to space, time, or energy.

Direction A movement element in dance; movement forward, backward, sideward, diagonally, circularly, up, or down.

Exploration Developing or creating movement based on ideas, stimuli, or images presented by the teacher or leader.

Folk Dance The traditional dances of a given country or area that have evolved naturally and spontaneously in conjunction with everyday activities and experiences of people who developed them. Folk dances are perpetuated from generation to generation in the manner of all folk traditions—from person to person, family to family, village to village.

Fragmentation The manipulation of movement: the original movement flow is broken into irregular pieces, or *fragments*. The original movement need not be completed when fragmentation is applied as a choreographic tool.

Free Flowing Of or pertaining to a manner of using energy that communicates a released and carefree intent.

General Space An area beyond personal space that is available for movement purposes.

Genre A kind or type of dance. Each dance genre is distinguished by specific learned technique with historical, cultural, kinesiological, or entertainment values.

Improvisation Movement created spontaneously, ranging from free form to highly structured environments but always with an element of change. **Improvisation** is instant and simultaneous choreography and performance.

Kinesthetic Of or pertaining to the ability of the sensory nerve endings in one's muscles, tendons, and joints to respond to movement while one is dancing or viewing dance.

Levels The altitude of a movement or shape (high, middle, low) in relationship to its distance from the floor.

Locomotor Movement Any motion in which the feet or any other part of the body is used to carry the body from one place to another (e.g., walking, running hopping, jumping, skipping, galloping, sliding, leaping, rolling, crawling).

Manipulate To shape and reform the dance movement.

Movement Phrase A sequence of movements that are ordered based upon a preconceived choreographic intent and contains a clear beginning, middle, and end that aligns with artistic intent. A movement phrase could be compared to a paragraph of movement and would contain two or more movement sentences.

Movement Sentence A sequence of movement that contains more than simple elements in an ordered sequence but contains a clear beginning, middle, and end and movements are enhanced by the application of body, shape, energy, and/or space.

Movement Sequence A brief sequence of movements that are not necessarily ordered into a formal choreographic structure that communicates artistic intent but rather demonstrates a solution to a movement problem. A movement sequence could contain as few as two or movements.

Movement Study or Composition A brief choreographic product that is created in response to movement generated to fulfill a specific exploratory intent. A movement study should contain more than one phrase of movement and could be compared to a few paragraphs of movement.

Movement Qualities The essential nature and quantity of energy expended in a movement; its force or strengthened feeling; the intention toward the movement; the shadings in the amount of energy, intensity, or power; subtle variations in treatment of movement contrasts. In some models, this dance element is referred to as *dynamics* or *efforts*.

Partnering Working with another dancer to create interesting movement through lifts, guiding, and/or weight sharing.

Pathways Patterns of dance movement in and through space as in straight, zigzag, curvy, or wavy.

Percussive Movement having a beating or striking quality.

Phrase A natural grouping of movements that give a temporary feeling of completion.

Production Elements Costumes, lighting, scenery, sound, and special effects.

Projection A confident presentation of one's body and energy to communicate movement and meaning vividly to an audience. It also refers to performance quality.

Replicate Performing movement accurately while following a leader.

Social Dance Dance that appears in one's own culture; this can include courtship dances, work dances, war dances, and communal dances also known as recreational and ballroom dance. Includes such dances as waltz, foxtrot, tango, meringue, salsa, mambo, rhumba, and swing.

Space An element of dance relating to the area through and with which the body moves and interacts.

Sustained A manner of using energy that communicates an intent to prolong the movement being executed.

Swing/swinging A body movement that has the quality or action of the pendulum on a clock as it traces an arc like path between two points—rising, falling, rising. The rising action is increasingly sustained, and the falling action is increasingly quickened.

Technology Electronic media (such as video, camcorders, digital recorders, CD players, iPods, stage lighting and sound, still cameras, computer software and hardware, and interwrite boards) used as tools to create, learn, explain, document, analyze, and/or present dance on stage or in the classroom.

Tempo The rate of speed at which dance movement is performed.

Transition An organized connection between dance movements that maintains continuity in the dance.

Unity One of the aesthetic criteria for evaluating dance: the state or quality of a coherent series of movements; the harmonious relationship among all dance elements that contributes to the sense of completeness.

Vibratory Of or pertaining to a sharp, quick action done by moving body parts quickly back and forth or side to side. The speed of the shaking can be changed slightly, but if the action is done too slowly, the vibratory quality is lost. Body parts can shake separately or simultaneously.

Warm-up Movements and/or movement phrases designed to raise the core body temperature, move the body through a preparatory range of movement, and bring the mind into focus for the dance.

Design

Introduction

Design is all around us and permeates every aspect of our lives. From waking up and deciding what to wear to making choices about our environment, purchases, and recreation, we interact with the work of designers. The design fields include, but are not limited to, Communication Design, Environmental Design, Experiential Design, and Object Design.

Functionality and aesthetics are two concepts that determine how we use a design and what we see in a design. For example, the science of a bridge (function) must also be aesthetically pleasing for its environment. The design process guides students to experience this interface by proceeding through a sequence of steps to find solutions for a design challenge. These steps include the following: defining the design challenge, conducting research, brainstorming solutions, constructing a prototype, presenting a design solution to a sample target group, receiving feedback, reflecting on the feedback, and making improvements on the prototype.

Students are guided through the design process to make creative and considerate decisions concerning the interaction of function and aesthetics toward constructing a well-crafted prototype. The process requires that students present their design solution/prototype, explain their thought processes, and receive feedback from stakeholders. This feedback allows students to analyze and reflect upon their work in order to make thoughtful revisions toward improvement.

The design standards are organized in steps that parallel the design process. Students move through the standards, as shaped by the design process, by working independently and collaboratively with others in order to reach an aesthetically-effective and functional outcome.

Students are immersed cognitively when involved in the design process. The use of skills such as communication, creativity, critical thinking, and problem solving are truly embodied in their work. Teaching through design reaches diverse learners who are able to approach design thinking from their own personal perspectives and abilities.

These design standards are written to be applicable across all content areas. Traditionally considered under visual arts, problem solving through design thinking may be applied to their artistic work but, just as importantly, it also may be used for project work in other disciplines. Effective practices will be employed in all student work as a result of studying the *South Carolina College and Career Ready Standards for Design Proficiency*.

Design Glossary

Aesthetics Concerned with appearance or the appreciation of beauty.

Artistic Processes The way the brain and the body make art and define the link between art making and the learner.

Aspects A particular part or parts of the design challenge.

Assess To estimate or evaluate the value of information researched.

Beta Testing Using a prototype to receive feedback from a sample target group.

Brainstorm A step in the problem solving process to producing an idea or several ideas. Ex. Popcorn Brainstorming, Passing Brainstorming, Questioning Brainstorming.

Communication Design Design directed towards making connections between people. Ex. Graphic design, packaging design, web design, etc.

Craftsmanship A degree or level of skill involved in creating a craft or work of art.

Define (a design challenge) Answering the design challenge questions to provide a clear description of what the design challenge is.

Design An outline, sketch, plan, model, or prototype of a solution to be developed or constructed that considers aesthetic decisions. See definitions of Object Design, Environmental Design, Communication Design, and Experiential Design.

Design Challenge A design problem or a design issue defined as having the need to be altered, changed, or created in a particular way to solve.

Design Challenge Questions Basic questions used to gather information concerning a design problem: *Who*, *What*, *Where*, *When*, *Why*, and *How*. The answers to these questions define the design challenge.

Design Problem A specific design aspect or issue regarded as needing to be dealt with, overcome, or changed.

Design Process A process designed to identify a specific design problem, research the problem, create a solution to the problem, and present the solution to the problem.

Design Solution A means of solving a design problem.

Design Thinking To use one's mind to apply the process of design.

Design Thinking Strategies Methods or procedures used to brainstorm ideas or reason the process of design. Ex: *Mind Maps, Concept Maps, Webdings, Electronic Brainstorms*, etc.

Environmental Design Design of surroundings or conditions in which a person, place, or thing interacts. Ex. Interior design, playground design, community planning, etc.

Experiential Design Design based on personal interactivity or experiences; sometimes referred to as interactive design. Ex. Design parades, design festivals, design theme parks, etc.

Feedback A reaction or response to a particular design problem or design solution.

Functional Referring to a design having a special activity, purpose, or task.

Interactions A person or a group of persons interacting with a prototype.**Investigate** To examine, research, or inquire the design problem or aspects of the design problem in order to create a solution.

Mind Mapping A visual diagram used to organize information and ideas. It starts with a single idea, written or drawn in the center of a blank page, to which associated words or ideas are added, continuing to associate the words and ideas.

Object Design Design of a material thing often related to industrial and product design. Ex. Design of tools, toys, cars, etc.

Passing Brainstorming A brainstorming technique in which individuals convey ideas one after another building upon the ideas of others in a group.

Physical Model A three dimensional replication or copy of a prototype

Popcorn Brainstorming A brainstorming technique in which individuals freely state ideas in a group.

Presentation An activity in which an individual or a team shows, describes, or explains a design solution to a group of people.

Prototype A two-dimensional product or three-dimensional model of a design solution. See definitions of physical models, space models, interactions, and storytelling.

Questioning Brainstorming A brainstorming technique in which individuals generate questions in a group that may later be explored.

Research Investigating the design challenge determining the who, what, where, when, why, and how using a variety of research methods; surveys, observations, interviews, experiments, internet, encyclopedias, newspapers, magazines, etc.

Sample Learning Target A broad lesson learning scenario.

Space Model a 2D or 3D replication or copy within which all things move

Standard Principle that is used as a basis for judgment.

Storytelling The use of words to describe the function or purpose of a prototype

Team A group organized to meet specific goals.

Techniques The use of tools and materials in unique ways that are specific to the designer and the medium.

Webbing Is a brainstorming technique that provides a visual structure or framework for idea development and can assist with organizing and prioritizing information.

Choral Music

Introduction

In writing the 2017 South Carolina Choral Music Standards, our goal was to bridge the 2010 South Carolina Choral Music Standards with the 2014 National Core Arts Standards for Music to create a simplified, relevant document for teachers and students to use in the Choral Music classroom. The purpose of this document and the “I can” language is to enable the teacher to become the facilitator of goals for the student using benchmarks to set achievable goals and to self-assess to take ownership of their learning.

Choral students come to us from a variety of musical backgrounds and experiences. A freshman high school choral classroom may consist of students who perform at novice levels as well as students who perform at advanced levels. Moving from a grade-level based model to a proficiency-based model allows teachers to meet students at their individual ability level to differentiate learning most effectively. Many choral teachers are also teachers of general or instrumental music. For simplified planning, we have chosen to streamline the wording of several standards, benchmarks, and indicators with the other music areas. The sample learning targets are specific to Choral Music. Our hope is that the 2017 South Carolina Choral Music Standards will not only be a valuable resource for the teacher as a facilitator, but also for the learner to be actively engaged in his or her educational goals.

Choral Music Glossary

A Cappella Choral or vocal music performed without instrumental accompaniment.

AB Binary Form The most basic musical form in which two contrasting sections are present.

ABA Ternary Form A basic musical form consisting of three sections (A, B, and A), the third section being virtually identical to the first. If it is exactly identical, the third section often is not written out, the performer simply being directed to repeat the first section (usually marked da capo or D.C.), as in the da capo aria and minuet or scherzo with trio.

Accelerando Gradual increase of speed.

Accidentals A note of a pitch (or pitch class) that is not a member of the scale or mode indicated by the most recently applied key signature, including the sharp (#), flat (♭), and natural (♮) symbols.

Accompaniment The additional but subordinate music used to support a melodic line.

Adagio Slow, leisurely, or solemn tempo.

Allegro Bright, cheerful or lively tempo.

Alto Second-highest vocal range.

Andante Moving along, flowing, at a walking pace.

Aria A long, accompanied song for a solo voice, typically one in an opera or oratorio.

Arrangement/Arrange Composition based on existing music (e.g., scoring for voices not used in the original piece, adding a percussion part to the original).

Articulation The manner or style in which the notes in a piece of music are sung.

Augmentation A melody, theme, or motif is presented in longer note-values than were previously used.

Aural By ear; without reference to or memorization of written music.

Baroque A genre of classical music of c. 1600-1750 which included composers such as Bach, Handel, and Vivaldi and has a heavy use of counterpoint and polyphony and conveyed drama and elaborate ornamentation.

Bass Lowest vocal range.

Bass Clef A symbol located at the beginning of a staff to indicate the pitches of the notes places on the lines and spaces below middle C.

Beat A main accent or rhythmic unit in music.

Bel Canto A lyrical style of operatic singing using a full rich broad tone and smooth phrasing.

Blend (Vowel Alignment) The combination of voices in group singing so that individual performers are indistinguishable.

Blues A kind of jazz that evolved from the music of African-Americans, especially work songs and spirituals, in the early 20th century.

Breath Support Efficient and appropriate use of the breath stream for phonation.

Cadence A sequence of notes or chords comprising the close of a musical phrase.

Cadenza A virtuoso solo passage inserted into a movement in a concerto or other work, typically near the end.

Call and Response The alternation of musical phrases between groups of musicians.

Canon/Round A composition for two or more voices in which one voice enters after another in exact imitation of the first.

Cantabile In a smooth, singing style.

Chant To recite musically.

Choir A group of singers who usually sing in parts with several voices on each part.

Chorale A musical composition (or part of one) consisting of or resembling a harmonized version of a simple, stately hymn tune.

Chord Three or more pitches sounded simultaneously or functioning as if sounded simultaneously.

Chord Progression (or harmonic progression) A series of musical chords.

Circle of Fifths The relationship among the 12 tones of the chromatic scale, their corresponding key signatures, and the associated major and minor keys.

Classical (1) Music written in the European tradition during a period lasting approximately from 1750 to 1830. (2) Homophonic texture, or an obvious melody with accompaniment. Melodies that tend to be almost voice-like and singable, allowing composers to actually replace singers as the focus of the music.

Con Brio Performed with vigor.

Closed Score A musical score in which two or more parts are put on the same staff.

Complementary Keys Keys sharing many common tones.

Compose To create a musical work or idea.

Composer A person who creates a musical work or idea.

Composition A musical work.

Compound Meter Beats are divided into three notes.

Concerto A musical composition for a solo instrument or instruments accompanied by an orchestra, especially one conceived on a relatively large scale.

Contemporary Music that can be understood as belonging to the period that started in the mid-1970s to early 1990s, which includes modernist, postmodern, neo-romantic, and pluralist music. However, the term may also be employed in a broader sense to refer to all post-1945 musical forms.

Count-Singing A choral rehearsal technique that involves singing the correct pitches, but replacing the lyrics with each note's position within a measure.

Crescendo A gradual increase in the loudness of a sound or section of music.

Cut Time A meter with two half-note beats per measure.

Decrescendo A gradual decrease in the loudness of a sound or section of music.

Diaphragmatic Breath Abdominal breathing, belly breathing or deep breathing; breathing that is done by contracting the diaphragm, a muscle located horizontally between the thoracic cavity and abdominal cavity. Air enters the lungs and the belly expands during this type of breathing.

Diction Enunciation. The clarity with which words are spoken or sung.

Diminution A melody, theme, or motifs presented in shorter note-values than were previously used.

Dolce Played in a tender, adoring manner; to play sweetly with a light touch.

Ostinati- Short music patterns that are repeated persistently throughout a performance, composition, or a section of one. (Singular form, ostinato.)

Partner Songs-Two or more different songs that are performed at the same time to create harmony.

Passage A musical idea that may or may not be complete or independent.

Patsch Patting either the left, right, or both thighs with the hands.

Pattern A repetitive sequence.

Pentatonic A scale made up of five tones (usually do, re, mi, so and la).

Percussion Family of instruments in which sound arises from the striking of materials with sticks, hammers, or the hands.

Permutation Any ordering of the elements of a set.

Phrase A division or section of a musical line, somewhat comparable to a clause or sentence in language.

Phrasing (1) A short musical idea similar to a sentence in spoken language; also a style of performance that gives shape to the musical phrases. (2) The grouping of consecutive melodic notes, both in their composition and performance.

Pianissimo (pp) Very soft.

Piano (p) Soft.

Pitch (1) The property of a musical tone that is determined by the frequency of the sound waves creating it. (2) The highness or lowness of a tone.

Plagal Cadence A chord progression where the subdominant chord is followed by the tonic chord (IV-I).

Posture The position of the body for singing. Chin parallel to the floor, shoulders back and down with chest held high. Abdomen flat and firm, held in an expandable position. Hands relaxed and still at the sides. Knees flexibly loose and never locked. Feet flat on the floor and shoulder-width apart. Weight of the body should be balanced on both feet and body held slightly forward.

Prestissimo Very fast.

Quarter (1) A note/rest having the time duration of one fourth of the time duration of a whole. (2) An ensemble of four performers.

Range The scope of notes that a voice can produce.

Recapitulation A part of a movement (especially one in sonata form) in which themes from the exposition are restated.

Recitative Musical declamation of the kind usual in the narrative and dialogue parts of opera and oratorio, sung in the rhythm of ordinary speech with many words on the same note.

Repeat Reiteration of a tone at the same pitch level.

Repertoire A selection of musical pieces that an ensemble or performer knows or is prepared to perform.

Rest A symbol standing for a measured break in the sound with a defined duration.

Retrograde Reverses the order of the motive's pitches: what was the first pitch becomes the last, and vice versa.

Rhythm The systematic arrangement of musical sounds, principally according to duration and periodic stress.

Rhythmic A set of beats and rests that defines the tempo and pace of a musical piece.

Ritardando Gradual decrease of speed.

Scale A group of notes (or pitch-classes) arranged sequentially, rising or falling.

Score A written or printed representation of a musical work.

Section A complete, but not independent musical idea.

Sforzando With sudden emphasis.

Sixteenth A note having one sixteenth the time value of a whole note.

Skip/Leap Any interval larger than a whole tone or whole step.

Soft Palate The fleshy, flexible part toward the back of the roof of the mouth. Lifting the soft palate reduces nasality in singing and produces a more open tone.

Solfege A system that uses distinct syllables to identify the various notes of a scale:do, re, mi, fa, so, la, ti, do.

Solo A single performer or a passage that is to be performed by a single performer.

Sonata A composition for an instrumental soloist, often with a piano accompaniment, typically in several movements with one or more in sonata form.

Soprano Highest vocal range.

Spiritual A religious folk song of African-American origin.

Staccato A dot above the note indicating that the note thus marked should be shortened to half its written length, the second half replaced with silence.

Step Dynamics Phrases or sections of music increase or decrease volume by steps in a piece of music (pp-p-mf-f).

Step An interval of a second.

Style The composer's manner of treating the various elements that make up a composition as well as the performer's manner of presenting the composition.

Syllables/Sight-Reading System A method of musical training involving both ear training and sight singing.

Syncopation To put stress on a normally unstressed beat.

Takadimi The beat is always called ta. In simple meters, the division and subdivision are always ta-di and ta-ka-di-mi. Any note value can be the beat, depending on the time signature. In compound meters (wherein the beat is generally **notated** with dotted notes), the division and subdivision are always ta-ki-da and ta-va-ki-di-da-ma.

Tempo (1) A steady succession of units of rhythm; the beat. (2) The speed at which a piece of music is performed or is written to be performed.

Tenor A singing voice between baritone and alto, the highest of the ordinary adult male range.

Tenuto A note or chord held for its full time value or slightly more

Tessitura The general range of a melody or voice part; specifically, the part of the register in which most of the tones of a melody or voice part lie.

Texture The number and relationship of musical lines in a composition.

Time (Meter) Signature Notation to specify how many beats (pulses) are to be contained in each bar and which note value is to be given one beat.

Tonality The use of a central note, call the tonic, around which the other tonal material of a composition is built and to which the music returns for a sense of rest and finality.

Tone Cluster A musical chord comprising at least three adjacent tones in a scale.

Tone Color/Timbre/Quality (1) The blend of overtones that distinguish a note played on a flute, for example, from the same note played on a violin. (2) The distinctive tone quality of a particular musical instrument or voice. (3) the character of musical tones with reference to their richness or perfection.

Tonic Triad A chord of three notes, the lowest note being the tonic of the key, the middle note being the third tone of the key, and the top note being the fifth tone of the key.

Traditional Notation Music written on one or more staves, using traditional note symbols and clefs to indicate pitch locations and durations.

Transpose To reproduce in a different key, by raising or lowering in pitch.

Treble Clef A symbol located at the beginning of a staff to indicate the pitches of the notes placed on the lines and spaces above middle C.

Trio An ensemble of three performers.

Triplets Three notes of equal length that are performed in the duration of two notes of equal length.

Triple Meter A primary division of 3 beats to the bar, usually indicated by 3 (simple) or 9 (compound) in the upper figure of the time signature.

Unison Two or more musical parts sounding the same pitch or at an octave interval.

Variations Formal technique where material is repeated in an altered form. The changes may involve **harmony**, melody, counterpoint, rhythm, **timbre**, orchestration, or any combination of these.

Verse and Refrain The verse section of the song is the section in which different sets of words are sung to the same repeated melody and contrasts with a refrain, where the words and melody are both repeated.

Vocal Inflection Alteration in pitch or tone of the voice.

Vocalist A singer, typically one who regularly performs with a jazz or pop group.

Vocalize A vocal exercise that is sung without words, typically using different vowel sounds.

Vocal Score Music score of a vocal or choral composition written for orchestral accompaniment, such as an oratorio or cantata. In a piano-vocal score, the vocal parts are written out in full, but the accompaniment is reduced and adapted for keyboard (usually piano).

Vocal Skills/Technique The abilities that allow a musician or group of musicians to perform with a refined degree of phrasing, dynamics and style.

Vocal Sound Source Sound created by a voice.

Voicing The manner in which one distributes, or spaces, notes and chords among the various voice parts.

Whole Note The longest note/rest duration in music.

South Carolina College- and Career-Ready Standards for General Music Proficiency

**South Carolina Department of Education
Columbia, South Carolina
2017**

General Music

Introduction

The new South Carolina Visual and Performing Arts Standards provide proficiency levels for student expectations. It should be noted that the nature of general music within a proficiency model demands a balance of each of the artistic processes to provide the South Carolina student with a comprehensive arts education in music. It should also be noted that further study in choral and instrumental music is essential to complete one's music education experience, as well as study in music theory, composition, and music history. This proficiency approach to learning music provides a continuum of artistic processes and skills that assist to prepare students from a novice (beginning) level to college- and career-ready (advanced high) level and builds state and national capacity to improve knowledge and competencies of future adults as musicians and consumers. Equally, it answers the growing need for the critical skills of higher order thinking and cultural competencies for relationship building in a safe and authentic way—a keystone for success in global endeavors and diverse social environments.

Given the research of the importance and contributions of music to the cognitive development (MacDonald, Kreutz, & Mitchell, 2012), and the positive correlations for student growth (Catterall, 2009), music is a necessary subject for the 21st century. Given the economic impact of the arts in South Carolina, music should also be viewed as a viable career option for South Carolina's students. However, learners begin new music experiences at different ages and progress toward proficiency at different rates. While the amount of quality time spent in each course of study is a determining factor in the proficiency level that learners will reach, learners at similar ages still frequently demonstrate varying proficiency levels. Acknowledging this continuum permits flexibility in how students will developmentally progress through the artistic processes. The South Carolina Standards for General Music outlines the progression of learner skills, which makes it easier for teachers to identify a learner's skill level and to differentiate learning for all learners.

Demonstrating proficiency in music has potential benefits for learners. Musical knowledge and skill proficiency can be documented through a variety of assessments and skills to be transferred directly to a career path. Colleges and universities often require at least one credit of music for entrance. Research supports that prolonged and sustained study in the arts produces not only better artists and critical thinkers, but also greater contributors to society as a whole (Catterall, 2009).

The rationale for the creation of this document stems from the need to provide a more transparent, learner friendly document that clearly describes benchmarks for learners at various stages, provide pathways for meeting these benchmarks, and suggest possible

strategies for a learning approach. Its intent is to recognize that everyone can learn music, to motivate learning, to increase achievement through goal setting and self-assessment, and to facilitate building functional knowledge of the role of music in a global society. The artistic processes, standards, benchmarks, indicators, and learning targets are meant to guide learning and should be shared with learners and made available to parents and other stakeholders.

The four artistic processes of Creating, Responding, Performing, and Connecting provide the framework for the standards that represent a comprehensive K–12 course of study and are interconnected and aligned with the National Core Arts Standards. This document also acknowledges the varied resources available throughout the state and provides possible strategies to meet the standard at each level of proficiency. The indicators can be viewed as units of study that support the standards. It should be noted that the learning targets are examples of appropriate lesson material to address the indicators leading to the benchmarks and are meant to serve as possible suggestions for the construction of lessons. The use of technology as a strategic tool through musical apps, digital recorders, computers, interactive boards, stereos, keyboards, phones, and Smart TV devices can enhance learning, increase engagement, and should be a part of the instructional toolbox for addressing the general music standards. The standards document helps motivate learning by showing how to set achievable goals, self-assess, and chart progress by using “I can” statements that facilitate this process. Learners take ownership of their individual development as a musician. The document guides the facilitation of music learning toward more functional, interactive, and culturally diverse processes. It provides examples of learning targets that can measure student growth at a defined proficiency level and describes the standard and indicator in terms of individual lessons. This document provides a clearer understanding of what learners need to know and be able to do to move from one level to the next. The ultimate goal of general music is to provide foundational support for the development of each student as a musician and leads them to continued participation in choral and/or instrumental music, as well as expanding their knowledge and interest as composers, theorists, and consumers of music.

General Music Glossary

AABA A design sometimes called rounded binary form it was sometimes originally used for short pieces such as dances. Also called song form, AABA is a variation of ABA in which the first section, A, is played twice before the middle section, B, and a third time to conclude the piece. During the late eighteenth century, the rounded binary form developed into the sonata form.

AB Binary form A basic musical form consisting of two sections, A and B; usually they are repeated, creating the form AABB.

ABATernary form A basic musical form consisting of three sections (A, B, and A), the third section being virtually identical to the first. If it is identical, the third section often is not written out, the performer simply being directed to repeat the first section (usually marked da capo or D.C.), as in the da capo aria and minuet or scherzo with trio.

Accompaniment A musical part that supports or partners a solo instrument, voice, or group.

Arrangement/Arrange Composition based on existing music (e.g., scoring for voices not used in the original piece, adding a percussion part to the original).

Articulation The manner or style in which the notes in a piece of music are sung. Attacking and releasing. Beginning and ending a sound clearly and distinctly.

Aural/Aurally By ear; without reference to or memorization of written music.

Blend To merge voices to form a unified resonant sound in which no individual timbre dominates.

Body Percussion The sounds created by using body parts as percussion instruments (for example, clapping hands, stamping feet).

Call and Response The alteration of musical phrases between groups of musicians. Three terms have been used to distinguish between different forms of call and response: adjacent (the response follows immediately after the call section); overlapping (the response begins before the call section has concluded; and interlocking (there is a continuous response with a counter solo passage over it, so that the call and response are “locked” together).

Canon Two or more voices in which one voice enters after another in exact imitation of the first. (See rounds.)

Characteristic Tone Quality The particular sound that is characteristic of a specific instrument at all dynamic and pitch levels and with all articulations.

Chord Three or more pitches sounded simultaneously or functioning as if sounded simultaneously. (See timbre, definition 1.)

Compositional Techniques Formal melodic, rhythmic, and harmonic techniques used by composers to create music. Combining music elements to form a whole including style, form, balance, complexity, and continuity.

Contour The shape of a melody or melodic line, contour can be seen by viewing a written piece, as well as heard as to the direction up, down, or staying the same pitch.

Cut Time Also called alla breve. Used for quick duple time in which the half note, or occasionally the whole note, is given one beat instead of two. Descants. Harmonizing voice parts added above the melody.

Developmentally Appropriate Taking into account the fact that developmental change is qualitative, sequential, directional, cumulative, multifactorial, and individual, diatonic A musical scale (major or minor) comprising intervals of five whole steps and two half steps.

Diction The choice and use of words and phrases in speech or writing.

Dotted Rhythms Rhythm patterns that contain dotted notes (a dot after the note indicates that the note should be extended by half as much again as the note's principal time value).

Dynamics Changes in volume; varying degrees of loudness and softness. Adjective form, dynamic.

Elements of Music Seven basic building blocks of music as follows:

1. Rhythm: (beat, meter, tempo, syncopation)
2. Dynamics: (forte, piano, [etc.], crescendo, decrescendo)
3. Melody: (pitch, theme, conjunct, disjunct)
4. Harmony: (chord, progression, consonance, dissonance, key, tonality, atonality)
5. Tone color: (register, range, instrumentation)

6. Texture: (monophonic, homophonic, polyphonic, imitation, counterpoint)

7. Form: (binary, ternary, strophic, through-composed)

Embellishments A group of notes or a single note added to a basic melody as ornamentation. In Orff-Schulwerk, embellishment is also a color part.

Ensemble Skills The abilities that allow a group of musicians to perform together with a refined degree of unanimity of phrasing, dynamics, and style.

Enunciation The clarity with which words are spoken or sung.

Form The structure or organization of a musical phrase or composition. AB, or binary, form (in which two contrasting sections are present) is the most basic. ABA, or ternary, form is derived from binary form and results from the repetition of the first section. Larger musical forms include rondo, theme and variation, sonata, and symphony.

Genre A type or style of music; an established form of musical composition such as ballad, concerto, folk music, lullaby, march, spiritual.

Good Posture The position of the body for singing. The chin should be parallel to the floor. The shoulders should be held back and down with the chest held high but not in a strained position. The abdomen should be flat and firm and held in an expandable position. The hands should be relaxed and still at the sides. Knees should be flexibly loose and never locked. The feet should be flat on the floor and held shoulder width apart. The weight of the body should be balanced on both feet and the body should be held slightly forward.

Harmony/Harmonic -(1) The pattern of intervals and chords in a composition. (2) The ways in which chords and intervals are related to one another and the ways in which one interval or chord can be connected to another. Adjective form, harmonic.

Head Voice A clear, open tone that resonates in the head and not in the throat or chest.

Improvisation/Improvise The creation of music in the course of performance. Verb form, improvise.

Intervals (1) Pairs of notes sounded at the same time. (2) The distances between two pitches. (Skip, steps, leaps).

Intonation The proper production of a musical tone so that it is played or sung in tune with characteristic tone for voice or instrument.

Improvise/Improvisation Create and perform (music, drama, or verse) spontaneously or without preparation.

Key Signatures The sharp, flat, or natural signs placed at the beginning of a staff indicating the tonality of the composition.

Major and Minor Tonality Keys based upon seven-tone diatonic scales and derived from ancient Greek modes and modalities. A pentatonic tonality is based upon a five-note scale usually made up of the pitches do, re, mi, so, and la.

Match the Pitch To sing (or play) the same pitch given by another instrument or person.

Meter The way beats of music are grouped, often in sets of two or three.

Motive A short tune or musical figure that characterizes and unifies a composition. It can be of any length but is usually only a few notes long. A motive can be a melodic, harmonic, or rhythmic pattern that is easily recognizable throughout the composition.

Notation/Notate A system used for writing down music showing aspects of music tones such as the tones to be sounded (pitch), the time each tone should be held in relation to the others (duration), and the degree of loudness (dynamics) at which the tone should be played. Verb form, notate.

Ostinati Short music patterns that are repeated persistently throughout a performance, composition, or a section of one. (Singular form, ostinato.)

Partner Songs Two or more different songs that are performed at the same time to create harmony.

Pentatonic A scale made up of five tones (usually do, re, mi, so and la) as opposed to the seven-tone diatonic scale and the twelve-tone chromatic scale. The pentatonic scale is found in the music of many Asian and African peoples, as well as in some European folk music. See tonality.

Pitch(1) The property of a musical tone that is determined by the frequency of the sound waves creating it. (2) The highness or lowness of a tone.

Pitched Adjective describing instruments that produce various tones; includes the families of brass, woodwinds, strings, and keyboards.

Question-and-Answer Adjective describing a pattern or phrase in which a pair of musical statements complement one another in rhythmic symmetry and harmonic balance.

Rhythm Syllables Musical training involving both ear training and sight singing. Whether the teacher chooses Kodály, Orff, Suzuki, or another method, it must be used appropriately, sequentially, and consistently.

Rondo The musical form in which the first section, A, recurs after each of several contrasting sections: ABACA.

Rounds Songs or instrumental pieces that begin with a single voice or instrument on the melody, followed at intervals by the other voices or instruments that enter individually and perform exactly the same melody, thus forming a polyphonic harmony out of a simple melody. (See canon.)

Solfège A music exercise involving both ear training and sight singing. Whether the teacher uses Kodály's methodology, John Feierabend's Conversational Solfege series, or the Alexander Technique, it must be used appropriately, sequentially, and consistently.

Style/Stylistic The composer's manner of treating the various elements that make up a composition—the overall form, melody, rhythm, harmony, instrumentation, and so forth—as well as for the performer's manner of presenting the composition. Adjective form, stylistic. Adverb form, stylistically. syncopation Stress on a normally unstressed beat.

Tempo(1) A steady succession of units of rhythm; the beat. (2) The speed at which a piece of music is performed or is written to be performed. Texture. The number and relationship of musical lines in a composition.

Theme and Variation A musical form consisting of a main idea followed by changed versions of that idea.

Timbre(1) The blend of overtones (harmonics) that distinguish a note played on a flute, for example, from the same note played on the violin. (2) The distinctive tone quality of a particular musical instrument.

Tonality The use of a central note, called the tonic, around which the other tonal material of a composition (notes, intervals, chords) is built and to which the music returns for a sense of rest and finality. The term tonality refers particularly to harmony and to chords and their relationships.

Triplets Three notes of equal length that are performed in the duration of two notes of equal length.

Two-and Three-part Songs written for two voices or three voices (for example, soprano and alto; soprano, alto, and baritone).

Unpitched Adjective describing instruments that do not produce various tones; includes such percussion instruments as claves, maracas, and wood blocks.

Verse and Refrain The verse section of the song is the section in which different sets of words are sung to the same repeated melody and contrasts with a refrain, where the words and melody are both repeated.

South Carolina College- and Career-Ready Standards for Instrumental Music Proficiency

**South Carolina Department of Education
Columbia, South Carolina
2017**

Instrumental Music

Introduction

The new South Carolina College- and Career-Ready Standards for Instrumental Music Proficiency were written for the learner. Learners begin new music experiences at different ages and progress toward music proficiency at different rates. The amount of quality time spent in each course of study is a determining factor in the proficiency level that learners will reach. Learners at similar ages frequently demonstrate varying proficiency levels. The continuum permits flexibility in acknowledging that students will developmentally progress through the artistic processes at varying degrees over time.

The 2017 Instrumental Music Standards align with the 2014 National Core Arts Standards for Music and contain some language and content from the 2010 Instrumental Music Standards. The 2017 standards were written within four artistic processes: creating, responding, performing, and connecting. Within the artistic processes, the document outlines benchmarks, indicators, and sample learning targets featuring “I can” statements designed to place the learner in the driver’s seat of their learning process. These standards cover Band and Orchestra. Standards related to performance contain Indicators and Sample Learnings Targets that are Band and Orchestra specific.

The ultimate goal of the 2017 Instrumental Music Standards is to provide a document that is learner centered, meeting individual educational needs and instilling a lifelong appreciation for music.

Media Arts

Introduction

Education systems in the United States have long recognized the need for national standards to provide the basis for a common curriculum and academic programs throughout the country. The South Carolina academic standards for Media Arts are emerging to new levels in South Carolina's academic standards for the Visual and Performing Arts. Studies in Media Arts utilize many of the elements and principles from other arts disciplines while creating a body of work that reflects its own list of developing elements and principles. Original media artworks reflect the aesthetics that are embedded in the visual and performing arts.

Our students are increasingly using media as a source of communication and networking. It is imperative that our educational system and its constituents remain current with the trends and technologies that accompany the use of media. This includes appropriate use of media and the ability to interpret Media Arts productions both socially and professionally to nurture the 21st century learner. The new 21st century skills movement (www.21stcenturyskills.org) specifically references media literacy as one of the skills all students need to be attractive to employers in this new century. This also aligns with the skills for the South Carolina profile of the high school graduate. Teachers should understand that these standards need to be reinforced throughout these proficiency levels as the students use more advanced tools and media applications as well as more complex terminology and concepts.

Studies in Media Arts function as a components of an overall school curriculum that addresses the role of diversity role in the classroom. Therefore, a school's Media Arts curriculum should include sequential Media Arts courses as well as specialized courses. Media Arts can include courses in animation; film studies; graphic design; sound design and recording; digital photography; digital painting/illustration; and social media/web presence. Programs of study are designed to expose the student to a variety of future career opportunities while making them globally aware of the importance that Media Arts plays in the classroom and beyond.

Media Arts Glossary

Artist Statement An artist statement lets you convey the reasoning behind your work-- why you chose a particular subject matter, why you work in a certain medium, etc. And further, a well-written statement shows the relationship of you to your artwork, and helps create a connection with the viewer that will make your work (and your name) more memorable.

Attention Principle of directing perception through sensory and conceptual impact.

Balance Principle of the equitable and/or dynamic distribution of items in a media arts composition or structure for aesthetic meaning, as in a visual frame, or within game architecture.

Codes and Conventions Codes are systems of signs put together (usually in a sequence) to create meaning. These systems may be verbal, visual, non-verbal, or aural (e.g., sound effects, music). Visual media may use a number of technical codes such as camera angles, framing, composition, and lighting to convey a particular attitude to a subject. Conventions are the commonly accepted or generally known methods of doing something. Codes and conventions are used together in the study and examination of a specific media genre. The camera angles used in a film, for example, should be studied in terms of the way camera angles are conventionally used in the particular type of film.

Components The discrete portions and aspects of media artworks, including: elements, principles, processes, parts, assemblies, etc., such as: light, sound, space, time, shot, clip, scene, sequence, movie, narrative, lighting, cinematography, interactivity, etc.

Composition Principle of arrangement and balancing of components of a work for meaning and message.

Constraints Limitations on what is possible, both real and perceived.

Continuity The maintenance of uninterrupted flow, continuous action or self-consistent detail. across the various scenes or components of a media artwork, i.e. game components, branding, movie timeline, series, etc.

Context The situation surrounding the creation or experience of media artworks that influences the work, artist or audience. This can include how, where, and when media experiences take place, as well as additional internal and external factors (personal, societal, cultural, historical, physical, virtual, economic, systemic, etc.)

Contrast Principle of using the difference between items, such as elements, qualities and components, to mutually complement them.

Convention An established, common, or predictable rule, method, or practice within media arts production, such as the notion of a ‘hero’ in storytelling.

Copyright The exclusive right to make copies, license, and otherwise exploit a produced work.

Criteria The elements and principles students use to design their work

Digital Citizenship A standard of behavior with regard to the appropriate use of technology. A set of ethical and social norms that oppose the misuse and abuse of technology.

Digital Identity How one is presented, perceived and recorded online, including personal and collective information and sites, e-communications, commercial tracking, etc.

Divergent Thinking Unique, original, uncommon, idiosyncratic ideas; thinking “outside of the box.”

Design Thinking A cognitive methodology that promotes innovative problem solving through the prototyping and testing process commonly used in design.

Elements of Media Arts Include but not limited to, light, sound, time, POV, performance, framing, narrative, and editing.

Emphasis Principle of giving greater compositional strength to a particular element or component in a media artwork.

Ethics Moral guidelines and philosophical principles for determining appropriate behavior within media arts environments.

Exaggeration Principle of pushing a media arts element or component into an extreme for provocation, attention, contrast, as seen in character, voice, mood, message, etc.

Experiential Design Area of media arts wherein interactive, immersive spaces and activities are created for the user; associated with entertainment design.

Fairness Complying with appropriate, ethical and equitable rules and guidelines.

Fair Use Permits limited use of copyrighted material without acquiring permission from the rights holders, including commentary, search engines, criticism, etc.

Force Principle of energy or amplitude within an element, such as the speed and impact of a character’s motion

Generative Methods Various inventive techniques for creating new ideas and models, such as brainstorming, play, open exploration, experimentation, inverting assumptions, rule bending, etc.

Heterogeneity How an artwork can be made up of many distinct experiences and parts that are independent however when placed together bring deeper meaning. Ex. installation that includes recorded, sounds, images, and performances.

Hybridization Principle of combining two existing media forms to create new and original forms, such as merging theatre and multimedia.

Information Literacy Skills The abilities necessary to access, utilize, and critically evaluate the products of the mass media, including an informed understanding of the nature of the media and the methods they employ.

Intent Purpose behind making a media art work whether personal or analyzed through the work made by others.

Interactivity A diverse range of articulating capabilities between media arts components, such as user, audience, sensory elements, etc., that allow for inputs and outputs of responsive connectivity via sensors, triggers, interfaces, etc., and may be used to obtain data, commands, or information and may relay immediate feedback, or other communications; contains unique sets of aesthetic principles.

Judgement The ability to make informed and cognizant decisions regarding a media artwork, especially in the critique process.

Juxtaposition Placing greatly contrasting items together for effect.

Legal The legislated parameters and protocols of media arts systems, including user agreements, publicity releases, copyright, etc.

Manage Audience Experience The act of designing and forming user sensory episodes through multi-sensory captivation, such as using sequences of moving image and sound to maintain and carry the viewer's attention, or constructing thematic spaces in virtual or experiential design

Markets The various commercial and informational channels and forums for media artworks, such as T.V., radio, internet, fine arts, non-profit, communications, etc.

Meaning The formulation of significance and purposefulness in media artworks.

Media Arts Contexts The diverse locations and circumstances of media arts, including its markets, networks, technologies and vocations.

Media Environments Spaces, contexts and situations where media artworks are produced and experienced, such as in theaters, production studios and online.

Media Literacy A series of communication competencies, including the ability to access, analyze, evaluate, and communicate information in a variety of forms, including print and nonprint messages.

Media Messages The various artistic, emotional, expressive, prosaic, commercial, utilitarian and informational communications of media artworks.

Media Texts Aural, print, graphic, and electronic communications with a public audience. Such texts often involve numerous people in their construction and are usually shaped by the technology used in their production. Media texts include papers and magazines, television, video and film, radio, computer software, and the Internet.

Medium Material used to create the art piece and determine the nature of the final work.Ex.film, digital imaging, web design.

Message Media messages contain “texts” and “subtexts.” The text is the actual words, pictures and/or sounds in a media message. The subtext is the hidden and underlying meaning of the message. Media messages reflect the values and viewpoints of media makers.

Modeling or Concept Modeling Creating a digital or physical representation or sketch of an idea, usually for testing; prototyping.

Movement Principle of motion of diverse items within media artworks.

Multimodal Perception The coordinated and synchronized integration of multiple sensory systems (vision, touch, auditory, etc.) in media artworks.

Multimedia Theatre The combination of live theatre elements and digital media (sound, projections, video, etc.) into a unified production for a live audience.

Narrative Structure The framework for a story, usually consisting of an arc of beginning, conflict, and resolution

Netiquette The correct or acceptable way of communicating on the Internet.

Personal Aesthetic An individually formed, idiosyncratic style or manner of expressing oneself; an artist's "voice."

Perspective Principle pertaining to the method of three-dimensional rendering, point-of-view, and angle of composition.

Point of View The position from which something or someone is observed; the position of the narrator in relation to the story, as indicated by the narrator's outlook from which the events are depicted and by the attitude toward the characters.

Positioning The principle of placement or arrangement.

Principles Media Arts Principles that include but not limited to, interactivity, heterogeneity, hybridization, medium, and temporality.

Production Processes The diverse processes, procedures, or steps used to carry out the construction of a media artwork, such as prototyping, playtesting, and architecture construction in game design.

Prototyping Creating a testable version, sketch or model of a media artwork, such as a game, character, website, application, etc.

Representation Media representations are the ways in which the media portrays particular groups, communities, experiences, ideas, or topics from a particular ideological or value perspective.

Resisting Closure Delaying completion of an idea, process, or production, or persistently extending the process of refinement, towards greater creative solutions or technical perfection

Responsive Use of Failure Incorporating errors towards persistent improvement of an idea, technique, process or product

Rules The laws, or guidelines for appropriate behavior; protocols.

Safety Maintaining proper behavior for the welfare of self and others in handling equipment and interacting with media arts environments and groups.

Soft Skills Diverse organizational and management skills, useful to employment, such as collaboration, planning, adaptability, communication, etc.

Stylistic Convention A common, familiar, or even "formulaic" presentation form, style, technique, or construct, such as the use of tension building techniques in a suspense film, for example.

Systemic Communications Socially or technologically organized and higher-order media arts communications such as networked multimedia; television formats and broadcasts; “viral” videos; social multimedia (e.g. “vine” videos); remixes; transmedia, etc.

System(s) The complex and diverse technological structures and contexts for media arts production, funding, distribution, viewing, and archiving.

Technological The mechanical aspects and contexts of media arts production, including hardware, software, networks, code, etc.

Temporality How the passage of time can change one’s interpretation of an artwork or one’s ability to witness the artwork.

Tone Principle of “color,” “texture,” or “feel,” of a media arts element or component, as for sound, lighting, mood, sequence, etc.

Transdisciplinary Production Accessing multiple disciplines during the conception and production processes of media creation, and using new connections or ideas that emerge to inform the work.

Transmedia Production Communicating a narrative and/or theme over multiple media platforms, while adapting the style and structure of each story component to the unique qualities of the platforms.

Virtual Channels Network based presentation platforms such as: Youtube, Vimeo, Deviantart, etc.

Virtual Worlds Online, digital, or synthetic environments (e.g. Minecraft, Second Life).

Vocational The workforce aspects and contexts of media arts.

South Carolina College- and Career-Ready Standards for Theatre Proficiency

**South Carolina Department of Education
Columbia, South Carolina
2017**

Theatre

Introduction

The 2017 South Carolina Theatre Standards are designed to support teaching the art of Theatre in classrooms throughout the state by aligning the 2010 South Carolina Theatre Standards and the National Core Standards. Students enter the Theatre class with varying degrees of Theatre instruction. This standards document allows teachers to identify students' aptitudes and competencies to ensure students receive a comprehensive, sequential, and in-depth study of Theatre Arts.

These standards retain the eight content standards from the 2010 SC Theatre Standards. These eight content standards: *Playmaking/Playwriting, Acting, Designing and Technical Theatre, Directing, Researching, Making Connections, Valuing and Responding, and Relating to History and Culture* are organized within the four artistic processes that are put forth in the National Core Theatre Standards.

Richly designed Theatre curriculum and instruction can reinforce the five essential elements of literacy instruction—phonemic awareness, phonics, vocabulary, fluency, and comprehension. Students that study Theatre improve their reading comprehension and both verbal and non-verbal communication skills.

The new Theatre Standards are rigorous and forward thinking. They underscore College and Career Readiness with benchmarks that guide students to gain World-class knowledge and World-class expertise. Performance and production opportunities further strengthen skills and provide “real-life” situations for students to sharpen their creativity, work ethic, and interpersonal skills.

Theatre is often called the “coming together” and “synthesis” of all the Arts. These standards are designed to guide the Theatre educator so students can explore Theatre as a collaborative art. Theatre teachers are encouraged to look at the interconnectedness of all the standards and the crossover from other Arts disciplines to build rich, strong Theatre programs.

Theatre Glossary

Actors' Equity Association (AEA) The U.S. labor union that represents Actors and Stage Managers.

Actor Abilities The strengths of the actor in relation to the actor's tools of imagination, the actor's body (movement and gesture), and the actor's voice.

Actor Tools A term used to describe the combination of an actor's voice, mind and body to play a role.

Actors The people in a play or dramatic work who portray the characters. This may be done through thought, action, dialogue, costumes, and makeup.

Aesthetic Preferences Artistic choices which give meaning and clarity to a production. Each theatre artist makes choices to contribute to the audience's experience through collaboration with the other members of the production.

Apron The flat wide part of the proscenium or thrust stage projecting into the audience and used as an acting area.

Arena A type of stage where the audience surrounds the acting area.

Artistic Choices Elements of a production that are distinctive to the vision of a particular production member (ex: character, lighting, set, directing choices).

Audience The group of people attending a performance.

Audience Etiquette The established practices and behavior that reinforce the community experience of theatre for all who attend performances.

Audition The process by which a performer reads for a part in a play.

Aural Pertaining to sound or what is heard.

Backstory Part of the given circumstances and used by actors for motivation for their characters.

Beats The timing or movement of the dialogue in a script, often denoted by a pause in speaking.

Blocking The patterns and arrangement of actors' movements on stage with respect to each other and the performance space. Often referred to as "staging."

Borders Wide, short draperies that span the width of the stage; these are used to mask lights and scenery that have been raised into the fly loft. Legs and borders are typically made from a heavy, light absorbing material similar to that of other stage drapes. Typically, a set of two legs, one on each side of the stage, and one border, is used to form a complete masking "frame" around the stage. Several such sets of legs and borders are typically employed at varying distances upstage from the proscenium.

Cast (v.) To select specific actors for character portrayal in a play or dramatic work (n.). The term given to describe the actors in a play or dramatic work.

Catharsis The purification or purgation of the strong emotions (such as pity and fear) that a tragedy creates in the audience, as explained by Aristotle in the *Poetics*.

Character The personality in a play or dramatic work. A character may be portrayed by an actor and developed through thought, action, dialogue, costumes, and makeup.

Character Conference The process of a director sitting down with an actor to discuss the various physical and vocal choices that the actor will apply to a character during his/her performance.

Character Qualities Characteristics which include social, physical, and emotional qualities of a character in a play or scene.

Cheat Out To turn your face or entire body out to the audience to be seen better without completely turning so it still looks natural.

Choreographer The person who designs dance compositions and arranges dance movements and patterns.

Climax The turning point in the conflict that forms the basis of the plot structure of a play.

Conflict The struggle between two opposing forces usually a protagonist and antagonist.

Costume Clothing worn by actors to portray specific characters.

Critique The analytical examination of a theatre performance, including such aspects as the skill and effectiveness of the individual actors, the cohesiveness of such collective elements as stage properties and lighting, and the overall literary merit of the play.

Denouement (French word) A series of happenings or events that follow the falling action of a play and bring resolution and allow for catharsis of a character.

Design (1) Any number of terms relating to the goals and purpose of theatrical design. (2) The fundamental descriptors used to communicate and evaluate the elements of design—for example, unity, emphasis, balance, line, shape, color, texture.

Design team A group of designers responsible for creating the look and feel of a production. The team generally includes set, lighting, sound, costume, properties, and makeup designers.

Dialogue The conversation between two or more characters in a play.

Director The person who oversees the entire process of staging a production. The director is a member of the ensemble charged with interpreting the text and conveying a central concept or theme through the use of the elements of theatre.

Dramatize To bring a story and/or character to life in a scene, play, or other dramatic work.

Dramaturg The person who provides specific in-depth knowledge of historical conventions, sources, context and literary resources pertaining to a particular production to a director, producer, Theatre company, or even the audience.

Ensemble A coordinated group of actors who work together for the common goal of a successful performance.

Exposition Introduces background information, establishes the setting, and presents important characters to the audience.

Falling Action The series of events in a play that follow the climax and the resolution of the conflict.

Given Circumstances The “who,” “what,” “where,” “when,” and “why” of a particular moment, scene, or play. Most often, the term is used in acting coaching or critique in relation to an actor’s understanding of his or her character’s situation and motivation.

Guided Drama A scene, play or drama activity that is led by a teacher or instructor.

House Describes the audience as a whole or where the audience sits in the auditorium.

Improvise/Improv A spontaneous style of theatre in which scenes are created without advance rehearsing or scripting. (Adjective form, “improvised”).

Inciting Incident The event that begins the conflict of the play and builds to the climax. Sets the central conflict onto motion.

Lighting The illumination of the performance dictated by the given circumstances of the play, including the source of light, the time of day, the mood of the play, as well as the specific requirements of the scenic design (for example, the areas to be lit).

Makeup Body paint or prosthetics worn by actors to portray specific characters and their traits.

Mime The art of showing a character or telling a story through movement and gestures non-verbally.

Mock Scenes Sample scripts/scenes used for rehearsal/educational purposes and not for a formal performance.

Monologue A speech made by a single character. In classical plays, monologues are delivered to another character or characters.

Mood The overall feeling or tone of a play/scene (this can be communicated through technical elements such as lighting, sound, scenery, costume; or through acting and script elements).

Morgue A collection of photos and clippings that create a reference file for makeup, costumes, props.

Motivation The justification or reason for a particular action taken by the character.

Narrative An oral or written sequence of events (story).

Objective The specific “want” or “need” of one character. The success is dependent on his or her overcoming the particular obstacles presented in the moment, scene, or play or on the actions of other character.

Obstacle The specific objects, thoughts, other characters, etc. that are stopping a character from fulfilling his or her objective.

One-Act A play that consists of multiple scenes, but only one act.

Open Scene (*also called Contentless scenes, Ambiguous scenes, Elliptical scenes, Spare scenes, Skeletal scenes*) Are exercises for acting classes. As their name suggests, they contain dialogue that is open to many interpretations; the lines are intentionally ambiguous, suggesting no particular plot or intentions.

Pantomime The art of acting without words through facial expression and gesture.

Performance Referring to the production of a play or dramatic work, or the specific acting/technical job of a production member in a play.

Playwright The person responsible for writing plays for performance in the theatre.

Plot The main events of a play or scene, written or improvised created by the playwright or improvisers.

Portfolio A collection of student work serving to showcase and document an artists' accomplishments.

Post-Mortem A way of critically evaluating the work of a production after the show closes so that each participant can use it as a learning experience for future improvement.

Production Elements Technical elements selected for use in a specific production, including sets, sound, costumes, lights, music, props, and makeup, as well as elements specific to the production such as puppets, masks, special effects, or other story telling devices/concepts.

Production Staff A group of theatre practitioners who work together to create a performance. Production teams are often comprised of a director, stage manager, lighting designer, sound designer, costume designer, scenic designer, and publicity staff.

Production Team/Meeting The team of people onstage and behind the scenes that make a performance possible (example: actors, director, technical crew, producer, etc.). This team may gather periodically to discuss the production process.

Professional Theatre Practitioner Someone who works in the theatre as a livelihood.

Prompt (v) Giving the actor a line if it is forgotten. Usually done by the stage manager during rehearsals. (n) Any suggestion/stimulus used as a starter for a scene or activity (e.g. a quote, a word, a location, character type, photograph, music clip, etc.).

Prop (Properties) Anything that the actor uses on stage that is not scenery (i.e. a coffee cup or a cell phone).

Proscenium A type of stage where the audience directly faces the playing area which is separated by a portal called the proscenium arch.

Rehearsal The repeated practice of a play or scene in order to prepare for the final performance.

Reimagined Theatrical Work Using a well-known or familiar work as a starting point, the director moves it beyond the time and place it was originally intended for to open up the work to a new audience.

Resolution Conflicts are resolved and the plot is made clear.

Résumé A brief, usually one page, historical list of your significant stage roles, theatrical experiences, training, and education. It also contains your physical description and contact information.

Rising Action The related events that create tension in the plot of a play and build to the climax.

South Carolina College- and Career-Ready Standards for Visual Arts Proficiency

Visual Arts

Introduction

Students who participate in the South Carolina standards-based education in the visual and performing arts are heirs to excellent arts opportunities and programs because of the vision and tenacity of generations of devoted arts educators in our state and throughout the nation.

It is important that all communities have visual art specialists with the knowledge and skills they need to teach art in a manner that will best enable students to learn. Organized lists of standards, benchmarks, indicators, and student learning targets help teachers to reach a high level of quality art instruction in a comprehensive arts education program for improved student growth. The South Carolina Department of Education recognizes the visual art standards as an essential resource for assisting and supporting excellent art teachers in schools. This visual-art teacher document presents the expectations for student growth and learning for Pre-kindergarten through twelfth grade.

This South Carolina Visual Arts document is designed to meet local and state and national visual arts standards and create individualized instruction for students. In addition, to align with the South Carolina Read to Succeed Act(Section 59-155-120 “Discipline-specific literacy”), we recognize that literacy is taught through the arts and have developed a statement explaining how administrators may support their teachers in all content areas in order to reinforce strong literacy-based classrooms. The purpose of this Visual Arts Literacy Policy Statement is to help administrators, principals, and teachers integrate literacy through the arts as effectively as possible. Referring to a wealth of information and research from leaders in the fields of arts disciplines, we will summarize our literacy statement position clearly and concisely. As arts educators, we believe in a broad definition of literacy by encouraging a multi literacy perspective for our students to make meaning. Expanding the clarity of literacy promotes broader understanding for our students, communication, individualized instruction, and inclusive learning environments. An extended curriculum includes visual literacy, musical literacy, the language of dance, literacy development through theatre, traditional print concepts to digital ones, and aligning reading comprehension strategies through the arts (Riddle, 2016).

Students are immersed cognitively when involved in the artistic process. The use of skills such as communication, creativity, critical thinking, and problem solving are truly embodied in their work. The visual and performing arts fall into all three 21St century thinking

skills categories: learning and innovation skills, life and career skills, and technology skills. (21st Century Skills, 2009) These 21st century skills will contribute to student success in a global economy and culturally diverse environments.

New visual arts standards are written to be applicable across all content areas. Effective practices will be employed in all student work as a result of studying the South Carolina Academic Standards for the Visual and Performing Arts. The standards have been developed to support the key artistic processes of Creating, Responding, Performing, and Connecting taken from the National Core Arts Standards developed by the National Coalition for Core Arts Standards in 2014. The new 2016 South Carolina Academic Standards for the Visual and Performing Arts align with the National Standards and maintain the essential content of the 2010 South Carolina Academic Standards for the Visual and Performing Arts. However, there are changes to the layout and language in an effort to create standards that are centered around the student. The new standards provide proficiency levels for student expectations. The continuum permits flexibility in acknowledging that students will demonstrate growth through the artistic processes at varying degrees over time.

South Carolina Department of Education professional staff, in collaboration with members of the South Carolina Academic Standards Visual and Performing Arts Development Team, created this series of arts-standards documents. The 2017 South Carolina Academic Standards for the Visual and Performing Arts draws on the expertise of K–12 arts teachers and administrators who were nominated by district superintendents and the professional arts education organizations for dance, music, theatre, and visual arts. We are grateful to all who those contributed to this effort.

The 2017 South Carolina Academic Standards for the Visual and Performing Arts will serve as the basis for the continuation of the comprehensive sequential arts education system offered in our state. In addition, these standards provide guaranteed experiences for our students to grow, perform, and produce in the arts.

Visual Arts Glossary

Aesthetics The branch of philosophy that deals with the nature and value of art objects and experiences. It is concerned with identifying the clues within works that can be used to understand, judge, and defend judgments about those works.

Artistic Literacy Knowledge and understanding required to participate authentically in the arts. It is embodied in specific philosophical foundations and lifelong goals that enable an artistically literate person to transfer arts knowledge, skills, and capacities to other subjects, settings, and contexts. (National Core Arts Standards: A Conceptual Framework for Arts Learning, 2016.)

Artistic Problem The question or problem presented to an artist that is meaningful and challenging for his or her level, to be solved through the artistic process. High quality artistic problems are developmentally appropriate and open-ended, supported by skill-building instruction, and designed to offer both challenge and opportunity for success.

Assess Analyzing and determining the nature and quality of students' growth through means appropriate to the subject. In art education there are many instruments used in assessment: rubrics, checklists, and reflection are among them.

Brainstorm Technique for the initial production of ideas or ways of solving a problem by an individual or group in which ideas are spontaneously contributed without critical comment or judgment.

Composition/Organizational Strategies An artist's arrangement or organization of the objects within a work of visual art. Adjective form: compositional.

Craftsmanship Evidence of performance with skill or dexterity, especially in the manual arts.

Creativity The process by which something new and somehow valuable is conceived and/or made, as in art and design problem-solving.

Creative Practices A student engaged in creative practices creates a mental image or concept, investigates and studies through exploration or examination, constructs a product by combining or arranging a series of elements, and reflects and thinks deeply about his/her work. http://www.nationalartsstandards.org/sites/default/files/Conceptual%20Framework%2007-21-16_0.pdf

Critique A critique is an oral or written discussion strategy used to analyze, describe, and interpret works of art.

Dance Elements The foundational concepts of movement that are body, action, space, time, energy.

Deconstructing The process of separating and examining the parts in a work of visual art in order to better understand that work as a whole.

Elements and Principles of Art/Design The basic design structural components of art and design including line, color, texture, shape, form, space, and value. Art principles include variety, unity, contrast, emphasis, movement, rhythm, pattern, and balance.

Intent Purpose behind making a visual artwork whether personal or analyzed through the work made by others. Purposes include storytelling, advocacy or activism (propaganda), expression through symbol, decoration, beauty, investigation of a theme, and function (such as in design fields).

Learner Outcomes in the Arts selected from the *21st Century Skills Map: The Arts*.
http://www.p21.org/storage/documents/P21_arts_map_final.pdf

Critical Thinking and Problem-solving Outcome: Students will use various types of reasoning to think and reflect critically and solve problems in both conventional and innovative ways.

Communication Outcome: Students will communicate in a variety of contexts through a variety of artistic media, including technologies, to convey their own ideas and to interpret the ideas of others.

Creativity Outcome: Students will draw on a variety of sources to generate, evaluate, and select creative ideas to turn into personally meaningful products

Innovation Outcome: Students will investigate new processes, implement creative ideas, and revisit traditional ideas to create new and reinterpret existing works of visual and performing arts.

Medium (Materials) The material or technique used by an artist to produce a work of art. Medium can also refer to what carries a paint's pigments, and is also called a vehicle or a base. The medium is what determines what kind of paint is produced.

College- and Career-Ready Standards for Visual and Performing Arts Proficiency

Portfolio A portable case for holding material, such as loose drawings, photographs, or other images. It may also be the materials collected in such a case, especially when they are representative of an artist's work. By extension, a portfolio might be a portable collection of originals or reproductions of an artist's work in a format other than the traditional case — as a set of digital images online or on a disc for example.

Process (Artistic) A complex operation involving a number of steps to complete any method or technique of art-making, such as the addition and subtraction processes in sculpture, the etching and intaglio processes in printmaking, constructing processes, or drawing and painting processes.

Processfolio A collection or documentation of an artwork/s throughout the stages of the artistic development. A processfolio shows the progression of artwork from conception to completion.

Subject Matter The content that the artist has chosen to represent in a work of visual art. Traditional subject matter in painting, for example, includes landscapes, buildings and street scenes, still lives, and the human face and figure.

Techniques The use of tools and materials in unique ways that are specific to the artist, the medium, or the art form. Abstract expressionist painters, for example, often use palette knives or tools intended for the application of cement or putty to apply thick layers of paint to canvas.

Theme Broad central idea. Examples include “identity,” “mankind’s relationship to nature,” and “change.” In the **arts**, a **theme** is a broad idea or a message conveyed by a work, such as a performance, a painting, a motion picture, or a video game. This message is usually about issues of life, society or human nature. **Themes** are the fundamental and often universal ideas explored in a work. [https://en.wikipedia.org/wiki/Theme_\(arts\)](https://en.wikipedia.org/wiki/Theme_(arts))

Visual Literacy The ability to interpret and make meaning from information presented in the form of an image.

Voice (Artistic) A particular opinion, attitude, or style expressed in artistic form (2D, 3D) or to visualize; to create a mental image of.
