

Learning@ACT

Educators, administrators, and career development professionals all need insights and strategies to build meaningful learning experiences, improve curriculum and instruction, and help ensure student success.

Learning@ACT is the perfect training partner for administrators and school systems looking to make a smart investment in their staff's professional learning. ACT product training and professional development events are designed with K–12 educators in mind.

The rich history of ACT as an assessment and research organization ensures your staff gets the best of everything—an understanding of how to better use assessments in the classroom, as well as insights, ideas, and practical strategies that can be implemented now to encourage student learning and progress.

Learning@ACT training events span a continuum of learning goals—from teaching educators the details of test administration to interpreting test data to answering the all-important “Now what?” questions that so often follows data analysis.

Learning@ACT Highlights

- Product training and professional development sessions available
- Multiple delivery options, from webinars to live on-site sessions in your location, provide the flexibility to meet your professional development needs
- Educators receive product training to successfully administer ACT products
- Sessions include strategies that are immediately useful in the classroom
- Sessions encourage educators to teach according to curricular standards, at the right depth of knowledge, using rigorous instruction to make sure students learn
- Educators can use the information to build stronger assessments and learn how to use the results to analyze curriculum and instruction
- Participants can integrate new information with existing products, programs, and knowledge
- Sessions support systemic improvement of K–12 education
