Introduction

PowerSchool is the current student information system (SIS) provided to school districts by the SC Dept. of Education and is THE source for student data. Student level data are input, validated and maintained by local school districts. The data are then transferred electronically to the Department of Education via the SIS Web Extract and Export Tool (SWEET) during defined collection periods. The submitted “source” data is ultimately used to fulfill SC State and/or national data reporting mandates.

The *PowerSchool Data Collection Manual* lists the PowerSchool fields from which data are collected by the SC Department of Education. This manual is updated annually.

Also included in this document,

- Schedule of data collection periods for 2013-14
- SCDE office names and contact information
- 2012-13 collected data - usage information
