

CABINETMAKING 1, 2, 3, 4
COURSE CODES: 6080, 6081, 6082, 6083

COURSE DESCRIPTION:

In the Cabinetmaking program, students acquire workshop and tool safety and employability skills as they practice reading and later interpreting blueprints; estimating and selecting materials; cutting and shaping stock; assembling, fastening, and installing components; and finishing surfaces. They also learn to install interior finishes, apply wood veneers and plastic laminates, finish surfaces, and transport and install cabinets. The technical, problem-solving, leadership, and creative skills learned in Cabinetmaking can be applied in industries well beyond construction trades and professions and can prepare students for lifelong learning and success.
