There are no charter schools in this district.			

## REPORT OF SUPERINTENDENT

Improved student achievement is a significant goal for the Jasper County public school system. We are responsible for the education of all students regardless of race, age, ability, talent or disability. The 2011-12 school year has brought many changes that have benefited our students.

Teachers use a variety of strategies and instructional techniques to meet the needs of students. Learning stations, cubing and tiered assignments, meaningful hands-on activities, partner and small group, and providing choices for students are but a few of the techniques designed to engage students through creative and challenging activities. Teachers also plan learning goals and outcomes with students; this helps students to have ownership in their learning.

Professional Development is another area that has become an essential part of our preparation to better serve our children. Teachers and other staff have received more than 100 hours of training in the various content areas. Educating the children of Jasper County is an ongoing investment. The Jasper County School District is committed to providing our children with a world class education that they so richly deserve!

Charged with the responsibility of preparing our students for the global economy, the Jasper County School District continues on its path to academic excellence. The 2011-12 school year has brought many successes for our school district. We have listened to parents and the community about the importance of safe schools, disciplined students, increased parent involvement and improved student achievement.

Providing a safe and orderly learning environment for our students has become a number one priority. All schools have access to school resource officers. Visitor sign-in procedures and the installation of a new security system allow us to know exactly who is in our buildings at all times. The new security system also provides protection to school property during times when schools are not in session. Teachers, students and parents have aggressively increased their participation in the Positive Behavioral Intervention and Supports (PBIS) system model. PBIS is a national model that rewards positive behavior. As a result of successful implementation, student expulsions are at an all-time low and most of the over-aged student population is serviced with other educational alternatives.

Schools understand the importance of quality parental involvement and have invested in creative forms of communication; the benefit has been a dramatic increase in parental participation. The Alert-Now phone system, newsletters, Facebook, school websites, regular parent workshops, Parent Teacher Student Organization (PTSO), Parent Teacher Association (PTA), School Improvement Council (SIC), parent conferences, and parent surveys are just some of the many forms of communicating with parents. Parents also have the opportunity to serve as chaperones on field trips which allows them to see how learning is extended beyond the classroom.
